About me

+4 years of experience as a web developer. Currently I am a frontend lead in SGPA project for Hocol. I live in Barranquilla, Colombia. I have worked in different environments: from accelerating the development of start-ups to leading teams in some companies.

Experience

Capytop

2026-01-01 - Present

Senior Frontend Developer

As a Senior Frontend Developer, I lead the development of high-impact web applications, applying best practices in code quality and architecture, collaborating directly with clients, and delivering scalable, production-ready solutions.

Enternova

2024-07-01 - Present

Frontend Tech Lead

As a Tech Lead specializing in React with TypeScript, I have guided my team toward continuous expertise in the technology, employing practices such as GitFlow and

Ship/Show/Ask. I have collaborated closely with the client and ensured high-quality deliverables.

Enternova

2024-02-01 - 2024-06-30

Senior Frontend Developer

As a frontend senior developer, I used React, JavaScript, TypeScript, PHP and led small teams for different projects, interacting directly with the client, using my soft skills to ensure the best environment for team collaboration.

Enternova

2023-09-01 - 2024-01-31

Mid-level PHP Web Developer

I used vanilla PHP and SQL Server to develop a sourcing product for a client. I worked with a small team of 3 people and led part of the development to ensure best practices and security.

Tobiro SAS

2024-11-01 - 2025-07-31

Full Stack Developer

I worked as a full stack developer creating 8 different products using .NET and React, building both frontends and backends. I also developed WPF plugins for desktop environments and led the design and implementation of full electronic invoicing systems integrated with the DIAN, including a robust PHP-based API.

Blesmaster

2021-04-01 - 2023-07-31

Mobile Developer

I led the development of a mobile application about coupons and offers with external enterprises, first using React Native CLI and TypeScript. I used Firebase services like Firebase Cloud Services (FCM) for push notifications.

NUTS

2020-01-01 - 2022-05-31

Mobile and Web Developer

I worked in web and mobile environments. I designed and developed landing pages and a ticket system for clients using React, WordPress, Remix, and Next.js. I collaborated with a small team dividing up tasks and ensuring project quality.

300Bees Branding Agency

2020-03-01 - 2020-07-31

Junior Web Developer

I developed landing pages and e-commerce systems using vanilla JavaScript and Shopify.
